ZERO WASTE COMMITMENT STATEMENT JULY 2008

Close the Loop (CtL) ensures that its operations manage the recovery and recycling of all imaging consumables in line with the philosophy of zero waste.

The CtL commitment to the zero waste philosophy ensures that as a company we do not dispose of materials in landfill facilities or through refuse incineration.

CtL periodically reviews and evaluates its operational strategies to assess the best practicable environmental option. The reviews are undertaken in accordance with our quality and environmental management systems, and with the intention of recovering all materials for re-use.
