

Round 'Em Up

... and drop 'em in our cartridge box

You can now recycle your old mobile phones including batteries*, chargers & accessories just by dropping them in our cartridge collection box.

Dig that old mobile from your desk drawer or bring 'em in from home. While you're at it why not bring your used cartridges from home too?

* Please ensure your battery is either connected to its handset when you recycle it, or if you are just recycling the battery please tape over the contacts so they can't come in contact with anything else in the box.
